Recommendation Letter

It is my pleasure to offer this letter of recommendation to **Mr. Syed Muhammad Momin Hassan** s/o **Syed Shahid Hussain Shad** bearing Registration No. BSCS-FA19-104, in support of his admission to the Master's Program at your university. I have known **Mr. Syed Muhammad Momin Hassan** for 4 years, while he was a bachelor's student enrolled in the *Computer Science*, I have taught him different courses in different semesters. As per my observations, he is a sincere, disciplined, and creative student who possesses a curious and analytical mindset.

Mr. Syed Muhammad Momin Hassan has maintained excellent and consistent academic grades throughout his academic career. As his teacher, I saw him keen interested in Human Computer Interaction and Artificial Intelligence, which I believe is an excellent sign for an aspiring academician. On several occasions, he has mentioned to me, his desire to pursue higher education in the field of *Computer Science* and aspiration towards a career in research.

His intuitive and methodical work has helped him in developing a broad perspective as well as mastery over fundamentals. He has shown great promise by venturing beyond the scope of the subject syllabus. His lab work was well disciplined and creditable. I may rank him among the top 10% of the students that are associated with me here at The University of Faisalabad.

Looking at his potential and enthusiastic nature, I strongly recommend him for any endeavor he chooses to pursue, especially, higher studies.

For any related query, I may be contacted.

All the Best

Dr. Majid Husain

Professor (Dean),

Faculty of Information Technology

The University of Faisalabad, Pakistan.
